Accurate history at what cost? Cloud 32B-Instruct (H100 vLLM) on S-EMBER
all cells scored on the same paired n = 839; marker shape = can the history be appended to without rewriting the cached prefix
RH3 Part 0: extending the video reuses 0 tokens — uniform re-spacing rewrites almost every frame
RH4 Part 0: appending 30 s to the fixed-stride history reuses ≥ 99.2% of the earlier prompt on 5/5 questions
